2012 NOT THE END

The end of the Mayan calender 2012 is not the end.

It is only the end of our earth horizon alignment,

slowly teetering earth back and forth.

Our earth veiw to the sky horizon and the stars above.

Base of ten per cycle of movement to the horizon.

This will be something to see and record in this

millennium, our horizon returning back.

The horizon alignment 2010 will return back

2 years from 2012.

This is a John M Simoncini theory only time will tell.

So until then it remains to be seen and recorded,

if my theory is right.

I date my theory 3-21-2010 John Michael Simoncini
